

Ain Shasha Binti Azhar

169, Kampung Sri Perigi, 06900 Yan, Kedah
+60 13-4830266
ainshashaazhar@gmail.com
Preferably contacted via WhatsApp or Email for
initial screening.

A highly motivated Game Technology graduate with hands-on experience in game programming and digital fabrication. Proven track record in developing complex 2.5D educational projects like "KARIB" using GDevelop, focusing on isometric logic and AI pathfinding. Skilled in UAV flight operations, 3D scanning, and additive manufacturing. A proactive problem-solver with a strong foundation in STEM, dedicated to creating immersive and functional digital experiences.
(Kindly contact via WhatsApp or Email for initial inquiries)

Education Background

• 2022-2026

Universiti Teknikal Malaysia

Melaka (Utem)

Hang Tuah Jaya,

Durian Tunggal,

76100, Melaka.

CGPA: 2.90

• 2020-2022

Kedah Matriculation College

Kementrian Pendidikan Malaysia,

06010 Changlun,

Kedah Darul Aman.

CGPA: 3.42

Work Experience

Game Programmer (Intern)

Teaching Factory UTeM,

Melaka

Oct 2025 - Mac 2026

- **Main Task:** Built a 2.5D educational flood awareness game from scratch using the GDevelop 5 engine.
- **Routine Task 1:** Operated UAV flight simulations and live DJI Tello drone maneuvers while monitoring telemetry data.
- **Routine Task 2:** Digitized physical objects through 3D scanning and fabricated prototypes using additive manufacturing.
- **Non-Technical Task:** Managed visitor programs as a technical facilitator and maintained a digital database for facility equipment.

Home Tutor

Yan, Kedah

March 2021 - Sept 2022

- **Conduct** one-on-one Mathematics and Additional Mathematics sessions for high school students.
- **Develop** engaging learning materials and lesson plans tailored to the curriculum.
- **Monitor** student progress and adapt teaching methodologies to suit individual learning styles.
- **Enhance** student comprehension and confidence to drive better academic performance.

Skills & Competencies

Hard & Technical Skills

- Microsoft Office : Word, PowerPoint, Excel
- 3D Modelling : Blender (Intermediate)
- Programming Language : C++, JavaScript, HTML, CSS, Blueprint(Unreal), Logic Event(Gdevelop)
- Game Engine : Unreal Engine (Intermediate), Gdevelop(Expert), Godot(Basic Skills), BuildBox(Basic Skills)
- Web Development : Front-end development, Responsive design, User interface (UI) design using HTML, CSS and JavaScript
- Databases : Basic knowledge of MySQL (SELECT, WHERE, JOIN)
- UAV Operations: Certified in Basic Drone Piloting (proficient in manual flight, simulator training, and Tello drone deployment)

Soft Skills

- Teamwork and Adaptivity
- Strong Communication Skills
- Time Management and Multitasking
- Problem-Solving skills

Teaching & Education Skills

- Lesson Planning
- Student Engagement Technique
- Classroom Communication
- STEM Education - Math & Addmath (Intermediate)

Languages

- Bahasa Melayu : Excellent (Speak & Write)
- English : Excellent (Speak & Write)

Projects

Project: KARIB (Kempen Amaran dan Ramalan Informasi Banjir)

(Gdevelop 5)

October 2025 – March 2026

- **Core Development:** Developed a game project using GDevelop 5, focusing on flood awareness and safety procedures for the Department of Irrigation and Drainage (JPS).
- **Technical Mechanics:** Programmed complex 2D and 2.5D mechanics, including isometric grid movement, custom pathfinding logic, and advanced collision handling to ensure smooth player interaction.
- **System Optimization:** Implemented a Y-Sort behavior system and waypoint-based AI to manage character depth and environmental layering within a top-down perspective.
- **Asset Integration:** Collaborated with the design pipeline by converting Procreate illustrations into optimized sprite sheets and functional game objects.
- **Quality Assurance:** Conducted iterative testing and bug fixing to refine gameplay loops, ensuring the educational content was both engaging and technically stable.
- **Stakeholder Presentation:** Demonstrated project milestones to academic mentors and international visitors, including representatives from Liverpool John Moores University (LJMU).

Project: Taboo Open World | Web-Based Horror RPG

(HTML, JavaScript, Node.js)

March 2025 – July 2025

- **Developed** a cross-platform, open-world horror RPG using JavaScript, Three.js, and Node.js for web browsers.
- **Architected** game mechanics NPC interaction systems, and goal-oriented puzzle logic (finding hidden keys).
- **Optimized** performance for rendering high-quality low-poly 3D environments and assets created in Blender and Mixamo.
- **Implemented** custom audio jumpscare logic and environmental storytelling to create a psychological horror atmosphere without graphic violence.
- **Conducted** extensive user testing with 30+ respondents using the Game Experience Questionnaire (GEQ), achieving high scores in sensory immersion (4.08/5) and competence (4.07/5).
